tvONE Introduces HDMI 4-port output module for CORIOmaster at ISE 2018

Margate, Kent, UK, 1 February 2018 - tvONE™ (www.tvone.com), a leading designer and manufacturer of cutting-edge video and multimedia processing equipment, will introduce a HDMI 4-port output module for CORIOmaster, providing the 4RU [C3-540 CORIOmaster](#) video wall processor with up to 56 outputs, at ISE 2018 (Stand 1-M130).

The CORIOmaster family, which includes the 4RU [C3-540 CORIOmaster](#), the 1RU [C3-510 CORIOmaster mini](#) and the ½ RU [C3-503 CORIOmaster micro](#), are modular 4K video processors with high quality CORIO scaling. Mixed input resolutions, pixel perfect window placement, source and screen orientations, bezel adjustment, edge-blending and customizable output resolutions all contribute to CORIOmaster being the most flexible video wall processor platform available. This allows designers to achieve the most striking visual effects possible.

CORIOmaster systems also feature streaming media and 4K playback modules, which allow digital video from the cloud or the internet to be seamlessly blended with local media and AV connections and presented together on a video wall in any desired configuration.

tvONE will also demonstrate [CORIOgrapher](#), tvONE's proprietary creative video wall design software for the CORIOmaster family. Designed to make the creation of custom video walls faster and easier to setup than ever before, CORIOgrapher gives creatives full access to the features of the CORIOmaster product line.

###

About tvONE

tvONE is a world class developer and manufacturer of video conversion and AV signal distribution technology. With offices in the US and R&D and Manufacturing facilities in the UK, tvONE provides a complete line-up of products and services for the professional AV, broadcast video and digital signage markets. Following the global merger of tvONE and Magenta Research in July 2013, the company tvONE now encompasses these two superior brands under one umbrella.

The tvONE brand specialises in video, audio and multimedia processing equipment, based on its proprietary CORIO® video conversion technology. Products include all-in-one system solutions, windowing processors, scan converters, seamless switchers, video scalers, up/down/cross converters, analogue-digital converters (SD/HD-SDI, HDMI, DVI), format converters and standard converters.

Magenta Research is the industry-recognised brand for the transmission, switching and flexible distribution of multi-format video, audio and auxiliary signals over fibre and Cat-X cabling. Products include AV extenders, distribution amplifiers and matrix switchers for DVI, HDMI, VGA, and component, composite, s-video, audio, USB, and RS-232 signals.
