Amsterdam. February 6-9 2018.

Stand 1-M130

tvONE introduces new CORIOview multi-window processor, 4K matrix routers and HDMI 4-port output module for CORIOmaster at ISE 2018

Margate, Kent UK - tvONE™ (www.tvone.com), a leading designer and manufacturer of cutting edge video and multimedia processing equipment, is launching **CORIOview**, the fastest, most intuitive 4K multi-window processor with up to 8 sources at ISE (Stand #1-M130). 4K multi-format AV matrix routers and an HDMI 4-port output module for CORIOmaster are also being unveiled at ISE 2018.

A first for ISE, is the new tvONE **CORIOview**, the fastest, most intuitive 4K multi-window processor with up to 8 sources. This easy to use, plug and play solution features auto-layout functionality which automates your preset selection, making usability a breeze. For more advanced applications, take full control with our front panel operation, including user definable or pre-programmable presets, video and audio switching. Be the instant expert when using our unique info button, which displays on screen info of your source and window selection.

The new **CORIO®matrix** (4RU) and **CORIO®matrix** mini (1RU), are ultra-flexible, modular, multiformat AV matrix routers with 4K capability. Designed for applications with mixed audio and video formats, their award-winning **CORIO®** technology is ideal for integrating mixed AV, broadcast, IP and legacy sources seamlessly at very low latency, allowing any source to be connected to any display with complete flexibility. Also new at ISE, the new **MX-6588 4K60 HDR 8x8 HDMI Matrix**. A 1RU matrix router that supports 4K60 4:4:4 and HDR along with 7.1 digital Audio.

Also on the stand, the all new HDMI 4-port output module, which supports 1080p60 on each port, providing the 4RU CORIOmaster video wall processor with up to 56 outputs. Come see tvONE simulate various unique application examples using each of the three CORIOmaster video wall processors, the CORIOmaster (4RU), CORIOmaster mini (1RU) and CORIOmaster micro (1/2RU).

The CORIOmaster family encourages your imagination to run free as it is the industry's most versatile, cost effective easy-to-use multi-window video processor on the market. CORIOmaster systems also feature streaming media and 4K playback modules, which allow digital video from the cloud or the

internet to be seamlessly blended with local media and AV connections and presented together on a video wall. tvONE will also demonstrate CORIOgrapher v2, designed to make the creation of custom video walls faster and easier to setup than ever and giving creatives full access to the features of the CORIOmaster family.

The always popular tvONE ONERack, a universal racking mounting solution with power and cooling is also featured on the stand. tvONE's patent pending design converts randomly sized, externally powered devices from ANY manufacturer into slide-in modules that can be installed quickly, cleanly and serviced easily. ONERack now features dual redundant power supply capability.

###

About tvONE

tvONE is a world class developer and manufacturer of video conversion and AV signal distribution technology. With offices in the US and R&D and Manufacturing facilities in the UK, tvONE provides a complete line-up of products and services for the professional AV, broadcast video and digital signage markets. Following the global merger of tvONE and Magenta Research in July 2013, the company tvONE now encompasses these two superior brands under one umbrella.

The tvONE brand specialises in video, audio and multimedia processing equipment, based on its proprietary CORIO® video conversion technology. Products include all-in-one system solutions, windowing processors, scan converters, seamless switchers, video scalers, up/down/cross converters, analogue-digital converters (SD/HD-SDI, HDMI, DVI), format converters and standard converters.

Magenta Research is the industry-recognised brand for the transmission, switching and flexible distribution of multi-format video, audio and auxiliary signals over fibre and Cat-X cabling. Products include AV extenders, distribution amplifiers and matrix switchers for DVI, HDMI, VGA, and component, composite, s-video, audio, USB, and RS-232 signals.
